

On **Earth Day 2021**, IGE Talks returns before the end of the pandemic, as volunteers step forward to initiate us into Zoom technology. Our plans include holding a live Zoom session on Earth Day, April 22, to discuss two interviews on "Solar Power" and "Regenerative Agriculture." You can join by watching the interviews, then participate in our live Zoom discussion. Contact us at

brandan.bilski@gmail.com to get the link, and stay tuned for details...

The future of "Solar Power" is so bright, I gotta wear shades. Wait, there's more! It's a solar coaster! The future of energy is solar, and it always will be! Local boy Lou Villaire reports on 40 years in solar power on the western slope

of Colorado, and a mile high in the future.

Then we talked to founding member of the Institute for Global Education, Sue Hartman. Her journey of activism included working at a

sustainable organic agriculture consultancy. Guess what microbes are up to.

## Join us Thursday, April 22, 7 pm

If you don't have Zoom, you can download it for free. Our Zoom expert Brandon will sort you out and get you up to speed. You can do that anytime before the program. Email [brandan.bilski@gmail.com](mailto:brandan.bilski@gmail.com) or download Zoom yourself at <https://support.zoom.us>.
